

# Standard of Excellence

## CHEMICAL PACKAGING

EMCO Chemical Packaging is a premier chemical contract blending and packaging provider in the United States specializing in the blending, filling and packaging of liquids. With plants located in the Chicago and St. Louis metro areas, supply of product across North America is cost effective. The facilities are designed to efficiently handle hazardous and non-hazardous products like solvents and water-based products. We have expertise in producing and packaging flammable and corrosive products, including isocyanates. Through the development of strong relationships with chemical and container manufacturers, EMCO is able to offer cost-effective, turnkey solutions by leveraging its purchasing power.

EMCO is able to manufacture and fill a variety of products due to its flexibility. In addition, the company stocks a number of different sized containers from 2 ounce up to 55 gallon in both metal and plastic. If blended bulk material is desired, EMCO has the capability to load and ship in totes and bulk tank wagons. Blends can be manufactured in sizes from 55 to 30,000 gallons. EMCO will invest in your business by adding equipment to fulfill your needs. EMCO continues to add capability, now handling powder blending and filling, in-house label printing, and warehousing with order fulfillment.

EMCO is ISO 9001 certified to the 2015 standard and has quality control labs at each site. With its Enterprise Resource Planning system, chemicals are lot traced from receipt through the blending, filling, and shipping processes. Eliminate your operational overhead and put EMCO's experienced team to work for you.

Give us a chance, we'll earn your business.

## CHEMICAL PACKAGING

Capabilities:
• Turnkey blending and packaging of polyisocyanates, flammable solvents and other liquids
• Filling of containers from 2 oz. bottles to bulk
• Tanks and equipment to manufacture orders from 55 to 30,000 gallons
• Warehousing and order fulfillment available
• Full-service laboratory staffed with degreed chemists
• Dry filling options from bulk to 50 lb. bags and super sacks
• In-house full color label printing
• Ability to fill metric sizes in both metal and plastic
• EDI order processing available

Current Packaging Options:
• Bulk shipments in rail cars and tank trucks
• Intermodal Bulk Containers or Totes
• Drums
• Pails

Should you be interested in other products, please contact us and we will review all potential product packaging capabilities to meet your needs and requirements.

Quality Control
• ISO 9001:2015 Certified
• Lot traceability back to raw materials
• Lot numbers applied to all filled containers
• Blending by weight using load cells
• QC testing of incoming raw materials
• In-line filtering of material
• Retention of blends and in-line samples
• Certificates of Analysis available upon request
• Ability to perform various quality control tests

PRODUCTS	
Paint & Coatings:	Cut Acrylic Resin, Isocyanate Hardeners, Lacquer Thinners, Paint Strippers, Reducers, 2k Epoxy Primers, Epoxy Curing Agents, Accelerators, Wood Stains, Clear Coats, Reactive Reducers, Acid Catalysts, Phosphoric Acid Blends, High Speed Dispersions, Powder Pearls, Concrete Sealants, Aziridene Crosslinkers, Low VOC Blends, Water-based Products, Degreasers, , Formaldehyde Blends
Industrial & Institutional:	Janitorial Supplies, Window Cleaners, Degreasers
Automotive:	Fuel Additives, Various Car Care Products
Personal Care:	Nail Polish Remover
