- Granules
- Household products
- Hydraulic fluids
- Ice melt compounds
- Industrial products
- Inks
- Insecticides
- Janitorial supplies
- Lubricants
- Paint thinners
- Paints
- Personal care products
- Pesticides
- Pet food
- Petroleum products
- Pharmaceuticals
- Pool products
- Roofing mastics
- Rubber cement glue
- Sanitation supplies
- Screws
- Solvents
- Spikes
- Weed killers

BWAY maintains modern, well-capitalized manufacturing facilities that are geographically aligned to ensure fast order fulfillment and superior customer service. Our dedicated, well-trained employees are committed to delivering exceptional products to customers.

MARKET EXPERTISE

BWAY has the market expertise that companies need to seize opportunities and improve profitability. Our markets continue to evolve at a rapid pace. We help customers adapt and grow in this changing business environment. BWAY provides cross-functional resources that bring customers and suppliers together to overcome challenges and generate solutions. Our packaging engineers, technical professionals and manufacturing experts have produced the most comprehensive and advanced line of packaging solutions available anywhere.

CUSTOMER FOCUSED

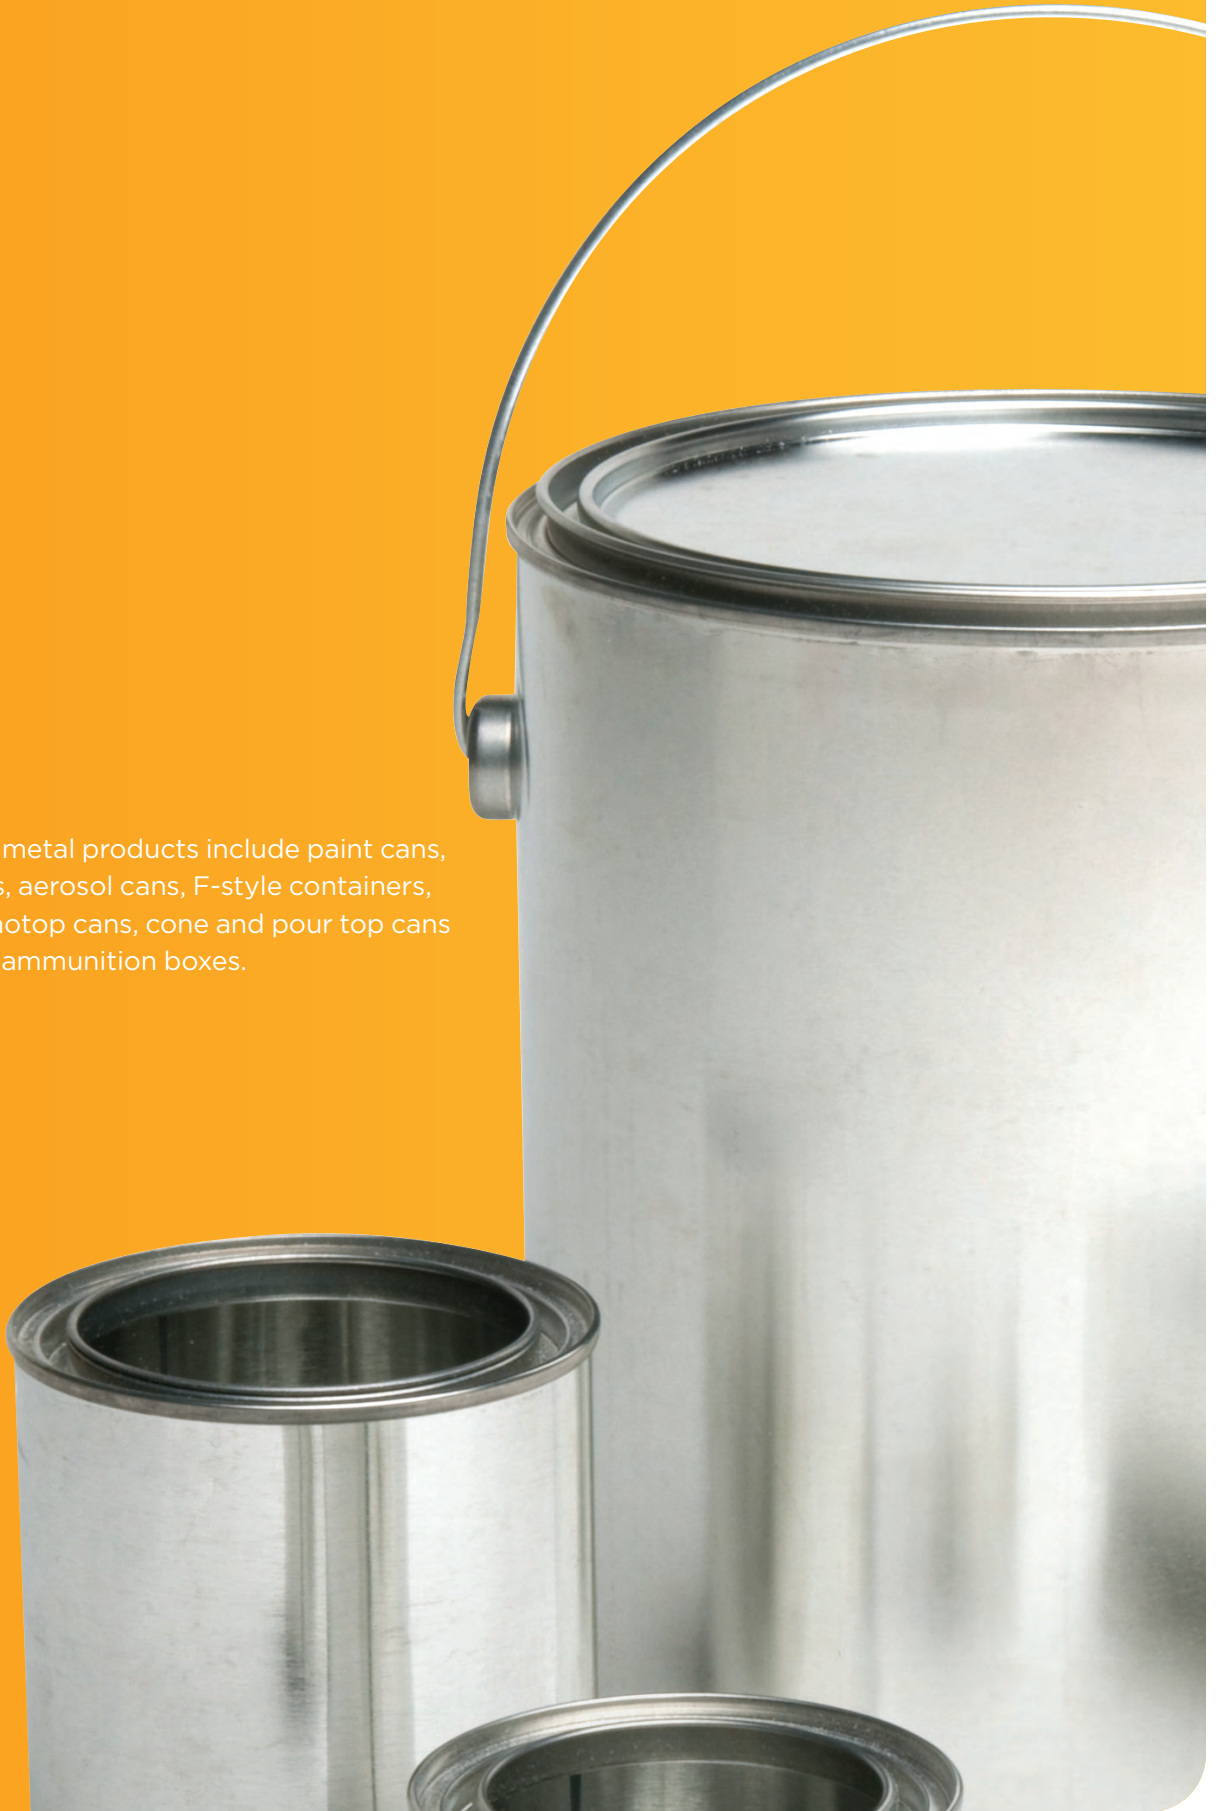

We have established a leadership position by staying customer focused. This steadfast commitment has contributed to our longevity and growth. We understand that providing the highest level of customer attentiveness is the key to success. BWAY works closely with customers to understand their packaging requirements. We collaborate with suppliers to streamline processes, improve products and lower costs for our customers through our aggressive lean manufacturing culture. Our vast distribution network ensures timely, reliable delivery.

RESPONSIVE SERVICE

BWAY understands that responsive service is critical in meeting the production requirements of our customers. Our staff includes knowledgeable sales managers, experienced customer service representatives (CSRs) and skilled technical support teams to address every request. This allows us to maintain consistent, multi-level customer contact. Our CSRs monitor scheduling, inventory and manufacturing for quick and efficient fulfillment of daily customer needs. Our technical support teams visit customer plants to provide in-depth expertise and support the integration of our products into operations.

Our metal products include paint cans, pails, aerosol cans, F-style containers, monotop cans, cone and pour top cans and ammunition boxes.

Our plastic products include the open head ECO-PAIL™, hybrid paint cans, pails, drums, and tight head containers.

CONSISTENT QUALITY

We offer the most consistent quality available in the general line packaging industry. BWAY has numerous manufacturing facilities across North America and delivers the same superior quality products from every plant. We make significant investments in quality initiatives to utilize current technologies, pursue zero defects, improve processes and train employees. BWAY adopts the latest solutions to strengthen product reliability and performance. Our Statistical Process Control automation is applied to all plants, shifts and production lines. We are vigilant in the design, engineering and testing of our products to ensure safe containment and transport to our customers.

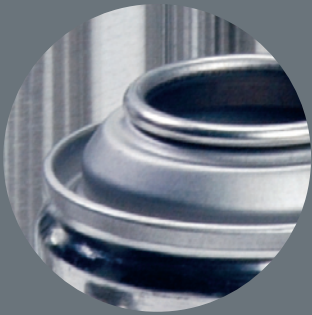

EXCEPTIONAL VALUE

BWAY delivers exceptional value through our talented people, unsurpassed services, state-of-the-art technologies and engineering processes. Our lean manufacturing initiatives remove waste, improve quality and reduce costs. BWAY constantly explores new solutions and improvements because innovative packaging creates business opportunities for our customers. We have a highly-developed strategy for bringing ideas to market quickly and cost-effectively. We foster continual improvements in systems, facilities and infrastructure which allow us to remain a leader in product development and operational excellence.

ENVIRONMENTAL STEWARDSHIP

We believe that the planet is our most precious resource. BWAY is committed to preserving it for generations to come. Our sustainability initiatives have been integrated into our manufacturing facilities to reduce our carbon footprint. We make every effort to procure recycled raw materials, and we produce packaging from post-consumer and post-industrial content. All of our containers are fully recyclable to meet the stringent requirements of government mandates and environmentally-savvy consumers.

**BWAY OFFERS COMPREHENSIVE PACKAGING
FOR A WIDE VARIETY OF APPLICATIONS.**

COMPREHENSIVE PRODUCTS

AEROSOL CANS

Our metal straight-sided and necked-in aerosol cans are available with or without linings. The universal cup opening allows for a wide range of spray and actuator buttons. Varnished bottoms are available by special request. Four-color and hexagraphic lithography provides high-quality design reproduction.

CONE AND POUR TOP CANS

We manufacture metal cone and pour top cans in standard capacities with drip-free beta nozzles. They can be fitted with child-resistant caps to pass UN certification for combination packages. Options include easy open ends for pouring and full panel removal with child-resistant features. Certain flange sizes are available for plastic snap-in fittings for pourable products. Full lithography can be printed on bodies.

METAL PAINT CANS

Our metal paint cans are available in standard capacities with or without linings. Paint cans with ARMLOKS meet UN Performance Oriented Packaging, U.S. Postal Service and UPS requirements. Full lithography can be printed on bodies and plugs.

AMMUNITION BOXES

We manufacture stackable ammunition boxes that are individually tested for air and water tightness. They comply with applicable U.S. military specifications. Stronghold boxes meet specific U.S. Department of Defense and international requirements. Covers have convenient drop down handles for portability, and they are removable and re-sealable for easy access and reuse.

F-STYLE CONTAINERS

We produce metal F-style containers that are available in standard capacities with a variety of metal nozzle sizes, flanges and fittings. UN-certified specifications and rigid metal handles are offered with certain sizes. Full lithography can be printed on bodies and tops.

MONOTOP CANS

Our metal monotop cans have tops constructed of a solderless, one-piece design. Screw caps with brushes or daubers are available by special order. Beaded cans are available for products requiring special filling or handling protection. Full lithography can be printed on bodies.

OIL CAN

We offer an all-metal oil can and loose ends. Full lithography can be printed on bodies.

STEEL TIGHT HEAD PAILS

We produce UN-certified and non-UN steel tight head pails with or without linings. Options include exterior coatings and wide-ranging cover fittings. D-handles can be installed. Full lithography can be printed on bodies and tops.

OPEN HEAD ECO-PAIL™

Our plastic open head ECO-PAIL™ with Tri-Seal cover is fully recyclable without the need to separate individual components. It has a lighter overall weight compared to conventional pails, utilizes recycled resin, and eliminates rubber gaskets and metal handles. The STRATUM pail body is high-density polyethylene with up to 50-percent recycled material. The Tri-Seal cover is made entirely of molded-in plastic. The flexible Eco-Handle can be produced from post-consumer or post-industrial material.

STEEL OPEN HEAD PAILS

Our UN-certified and non-UN steel open head pails are offered straight-sided and tapered with or without linings. Options include exterior coatings and wide-ranging cover fittings. Pails can be made with or without beads. A variety of covers and gaskets are available. Bail handles can be installed. Full lithography can be printed on bodies and covers.

PLASTIC DRUMS

We produce plastic drums in a wide range of sizes. They are blow molded from FDA-approved high-density polyethylene and are UN/DOT-certified. Drums are available in custom colors. Two-piece drums are made with a separate ring for color coordination. NPS and tamper-evident plugs are offered with certain sizes. They are reusable and reconditionable.

PLASTIC TIGHT HEAD CONTAINERS

We offer round, rectangular and square plastic tight head containers made of FDA-approved high-density polyethylene. Most containers are UN/DOT-approved without the use of an outer pack. D-handles, integrated handles and multiple fittings are available.

COMPREHENSIVE PRODUCTS

PLASTIC OPEN HEAD PAILS

Our UN-certified and non-UN plastic pails are offered in many sizes with various fittings and cover configurations. Covers include standard options and our proprietary Tri-Seal technology. The round, square and rectangular tapered containers are made from FDA-approved high-density polyethylene or polypropylene. Plastic and metal handles are available for most sizes. Child warning labels are hot stamped on pails. Decorations, instructions, restrictions and cautions can be applied.

TWIST AND LOCK PAILS

Our patented UN-certified plastic twist and lock pails utilize a unique closure system that passes child-resistant and senior-friendly protocols and has an optional tamper evident feature. The round containers are constructed of high-density polyethylene and are available with plastic handles. Decorating options include offset printing, silk screening, pressure sensitive labels and heat transfer.

SCREW TOP INJECTION PAILS AND DRUMS

Our UN-approved plastic screw top injection pails and drums are available in wide-ranging sizes. The covers provide senior-friendly and child-resistant features and most are tamper evident. The round containers are made of high-density polyethylene. Molded grips and applied handles are available depending on the pail capacity. Offset printing is offered.

HYBRID PAINT CANS

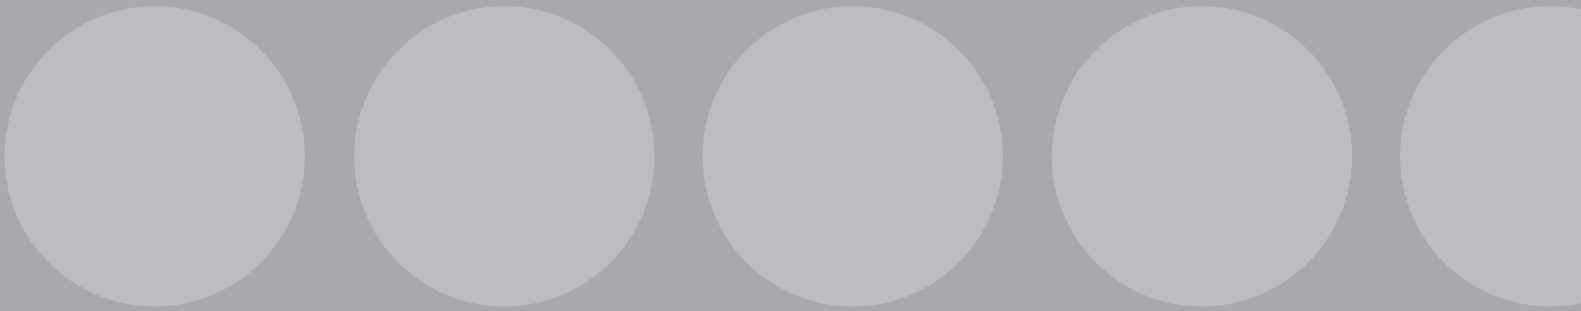

We make hybrid paint cans in standard sizes. They have polypropylene bodies resistant to rust and dents. Metal components including rings and plugs are provided with a special gray lining. Hybrid containers are designed to be interchangeable with metal paint cans.

GET AHEAD

Our vast resources can help your business get ahead. BWAY provides the packaging innovation that your company needs to thrive in today's competitive marketplace. Our market expertise ensures that you are poised to respond to the ever-changing business climate. We are customer focused which enables us to understand your packaging requirements and deliver exactly what you need.

Our responsive service makes sure your production requirements are met quickly and efficiently. We provide consistent quality so you can count on the same superior products from all our manufacturing locations. BWAY offers exceptional value through our continual investments in product development, manufacturing facilities and process improvement.
