

Sustainability

Taking action together

Sustainable behaviors and solutions are vital. For the health of our planet and society, and for the prosperity of Azelis.

Together we will continue to build a resilient, thriving, and responsible business. We will meet the needs of our stakeholders, whilst also creating a positive and widespread impact on the environment and communities around the world. Future generations need sustainable action now.

Through 'Action 2025', our sustainability strategy, we want to become the world-leading distributor of sustainable solutions and services in the specialty chemicals distribution industry.

It is our vision to fulfill our role as a specialty chemical service provider by empowering the sustainability aspirations of our principals and customers into innovative sustainable solutions.

To join our journey towards a more sustainable future, please get in touch.
